

Company Profile

Introduction:

Established in 1987, **AMZOLE INDIA PVT. LTD.** was originally a manufacturer of 2-Methyl Imidazole (CAS No. 693-98-1). However, due to strategic reasons, in late 1988 the plant process was changed to produce Glyoxal-40% (CAS No. 107-22-2) instead. Having its primary manufacturing unit at **41, Udhyog Vihar, Sukher Udaipur – 313004 India**; today the company boasts to be the largest manufacturer of Glyoxal-40% in South-Southeast Asia.

Capacity:

Currently, Amzole India Pvt. Ltd. has a production capacity of **500 MT of Glyoxal-40% per month**, largest in South-Southeast Asia. This capacity is a combination of four 125 MT/month plants.

Utilities:

Spare backups for all utilities are kept on-site to avoid any production loss in the event of a breakdown. Besides keeping spares, the plant and machinery has been standardized to minimize downtime due to breakdowns. As a result of standardization, all pumps are of the same brand which can be replaced with spares from our stores at a moments notice. All these plans and safety measures ensure a continuous supply of our product to our esteemed clients and we pride ourselves at being one of the most reliable suppliers in the industry.
